Agenda

- 01** Challenges of using AI

- 02** The Model Context Protocol

- 03** The UI5 MCP Server – Your UI5 expert

- 04** UI5 MCP Server: Create new projects

- 05** UI5 MCP Server: Migrate legacy projects

Challenges of using AI

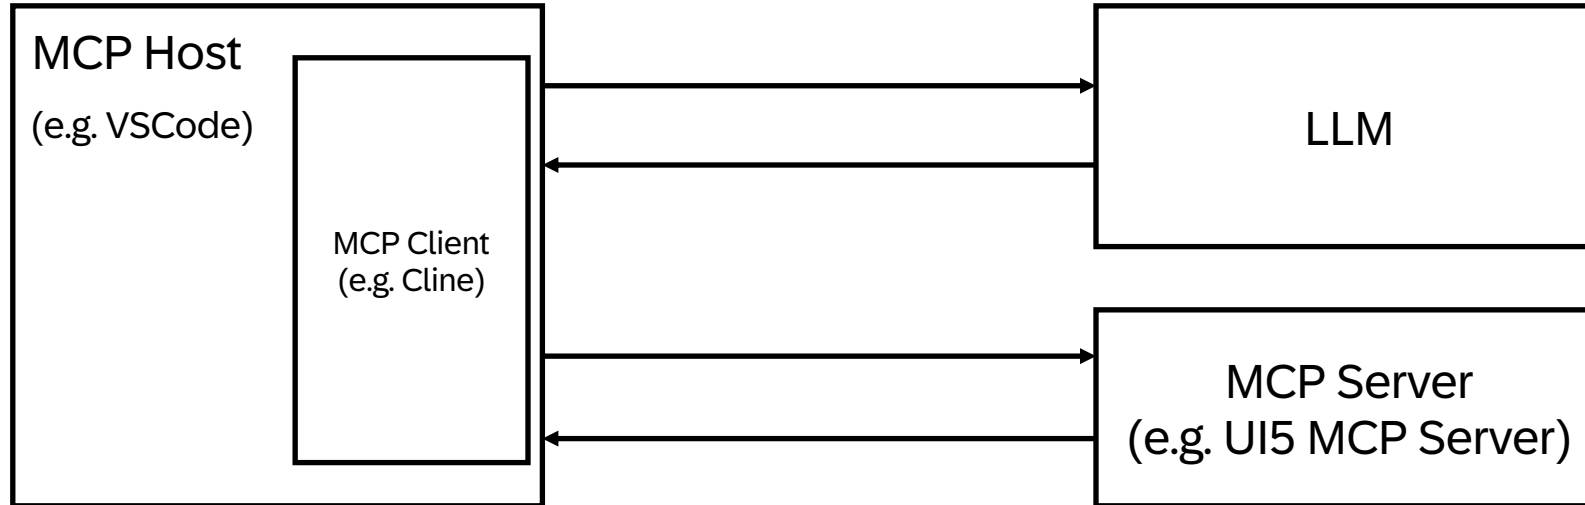

- LLM uses outdated concepts
- LLM does not use framework specific best practices
- LLM uses older framework version
- LLM generates code which does not work at all

Model Context Protocol (MCP)

- MCP (Model Context Protocol) is an open-source standard for connecting AI applications to external systems.
- Using MCP, AI applications can connect to data sources, tools and workflows enabling them to access key information and perform tasks.
- “MCP is the USB-C port for AI applications”

Source: <https://modelcontextprotocol.io/docs/getting-started/intro>

MCP Servers – offer expertise to LLMs

Model Context Protocol (MCP) servers – offer expertise to LLMs

- Helps with the creation and modification of projects when working with agentic AI tools
- Supports the developer to detect and fix errors in the code
- Provides additional framework specific information for agentic AI tools
- Supports with complex, costly tasks to reduce errors and token-usage

MCP servers from SAP for developers

Availability

- Open source
- As node modules on <https://www.npmjs.com/>
- [Overview blog](#)

MCP server for CAP

- Development of CAP applications

MCP server for SAP Fiori

- Create or modify SAP Fiori elements applications

UI5 MCP server

- Creation of new UI5 projects
- Detect and fix UI5-specific errors in the code

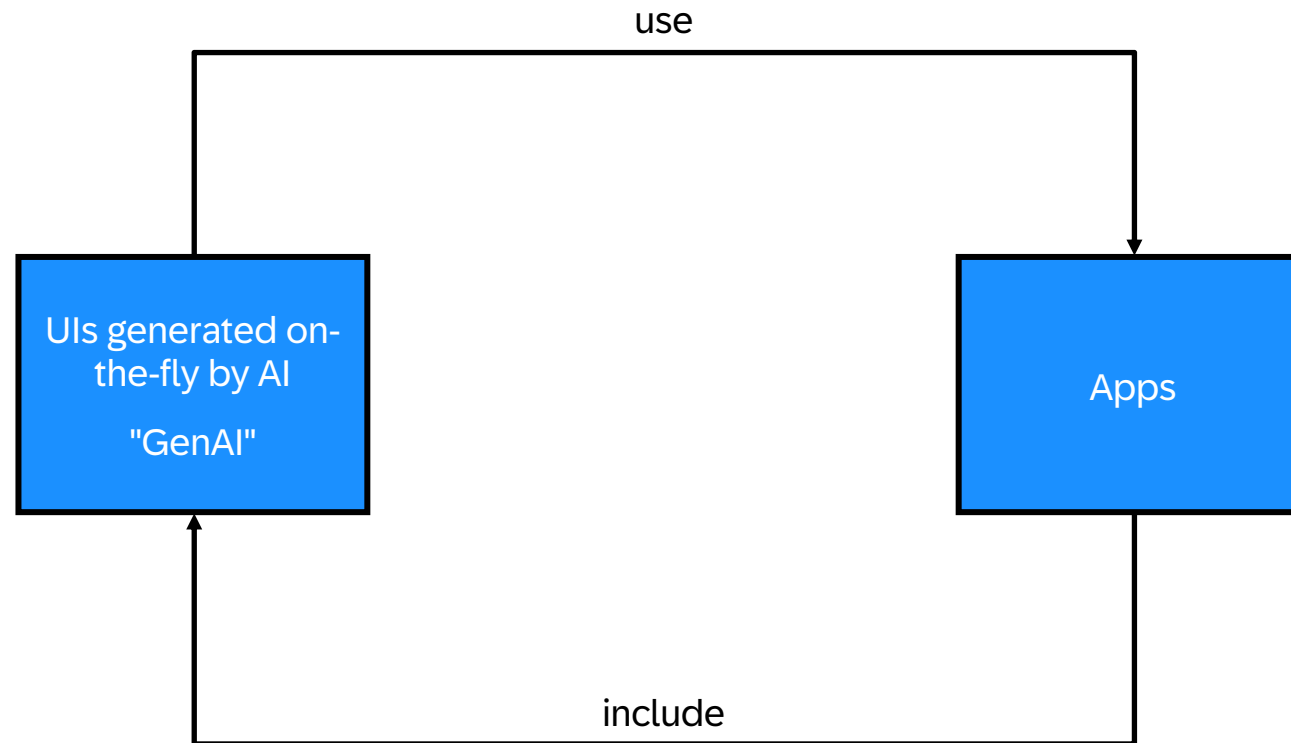

UI5 Web Components MCP Server

- Development of Web Applications with UI5 Web Components

MCP server for mobile development kit (MDK)

- Create or modify MDK based mobile apps

User Interfaces in the world of AI

UI5 a.k.a. OpenUI5 / SAPUI5

- A state-of-art UI framework maintained by SAP and the Open-Source community
- Enterprise ready features
- Best-in-class UI controls
- Consistent look and feel
- Stability
- Seamless SAP ecosystem integration

UI5 MCP Server: Key Features

Create a new UI5 project

Validate a project

Create a new UI5 Integration Card

Migrate project to TypeScript

Apply UI5 best practices to project

UI5 MCP Server: Tools Overview - March 2026

Create UI5 App

Get API Reference

Get TypeScript
Conversion Guidelines

Run Manifest Validation

Get Guidelines

Get Project Info

Get Integration Cards
Guidelines

Get Version Info

Run UI5 Linter

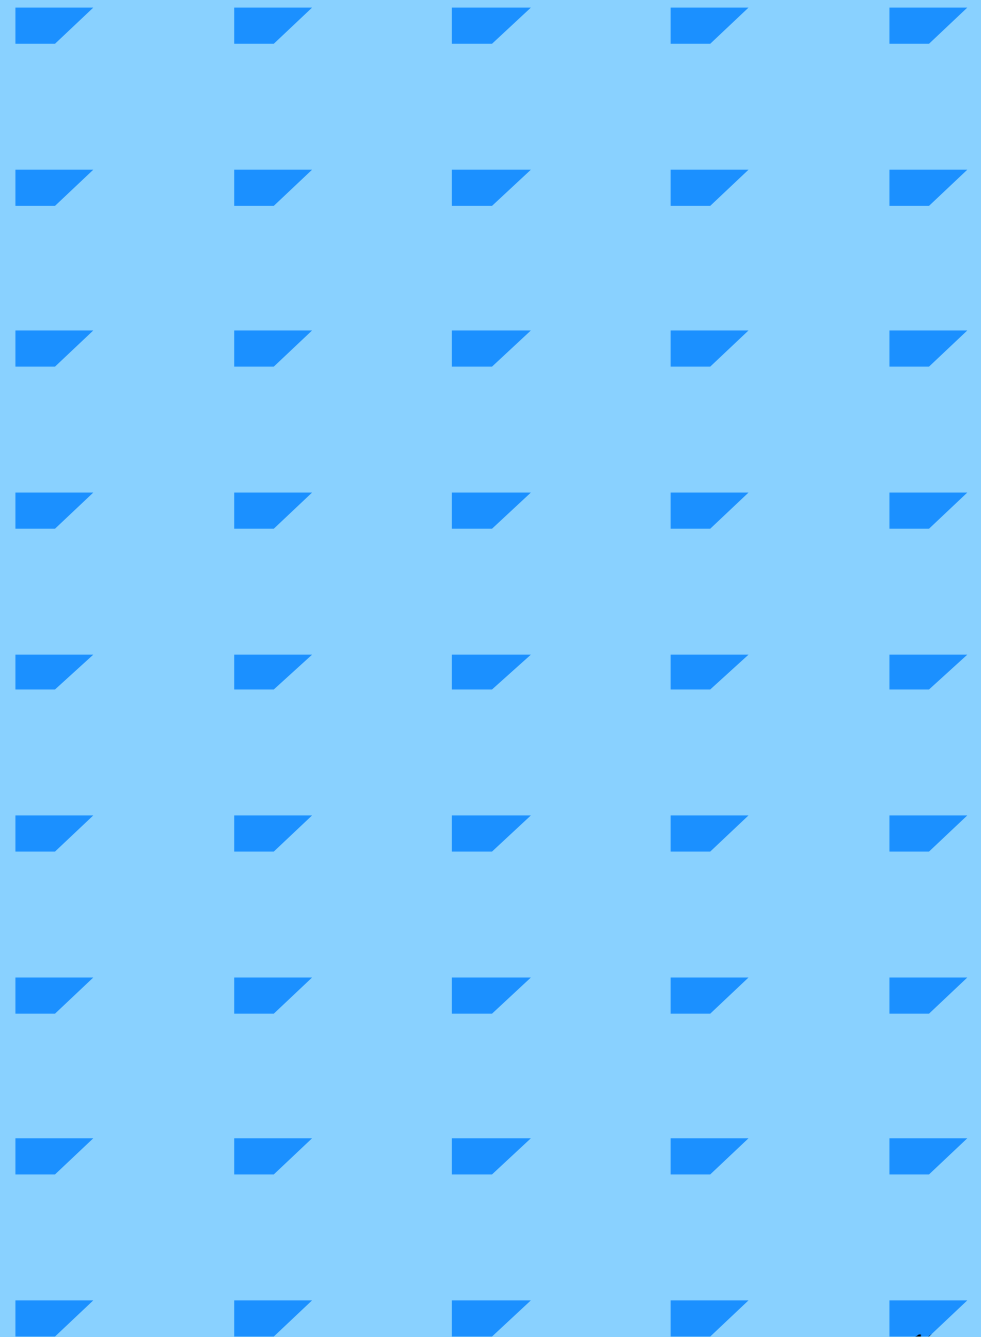

Create Integration Card

And many more to
come....

Just do it

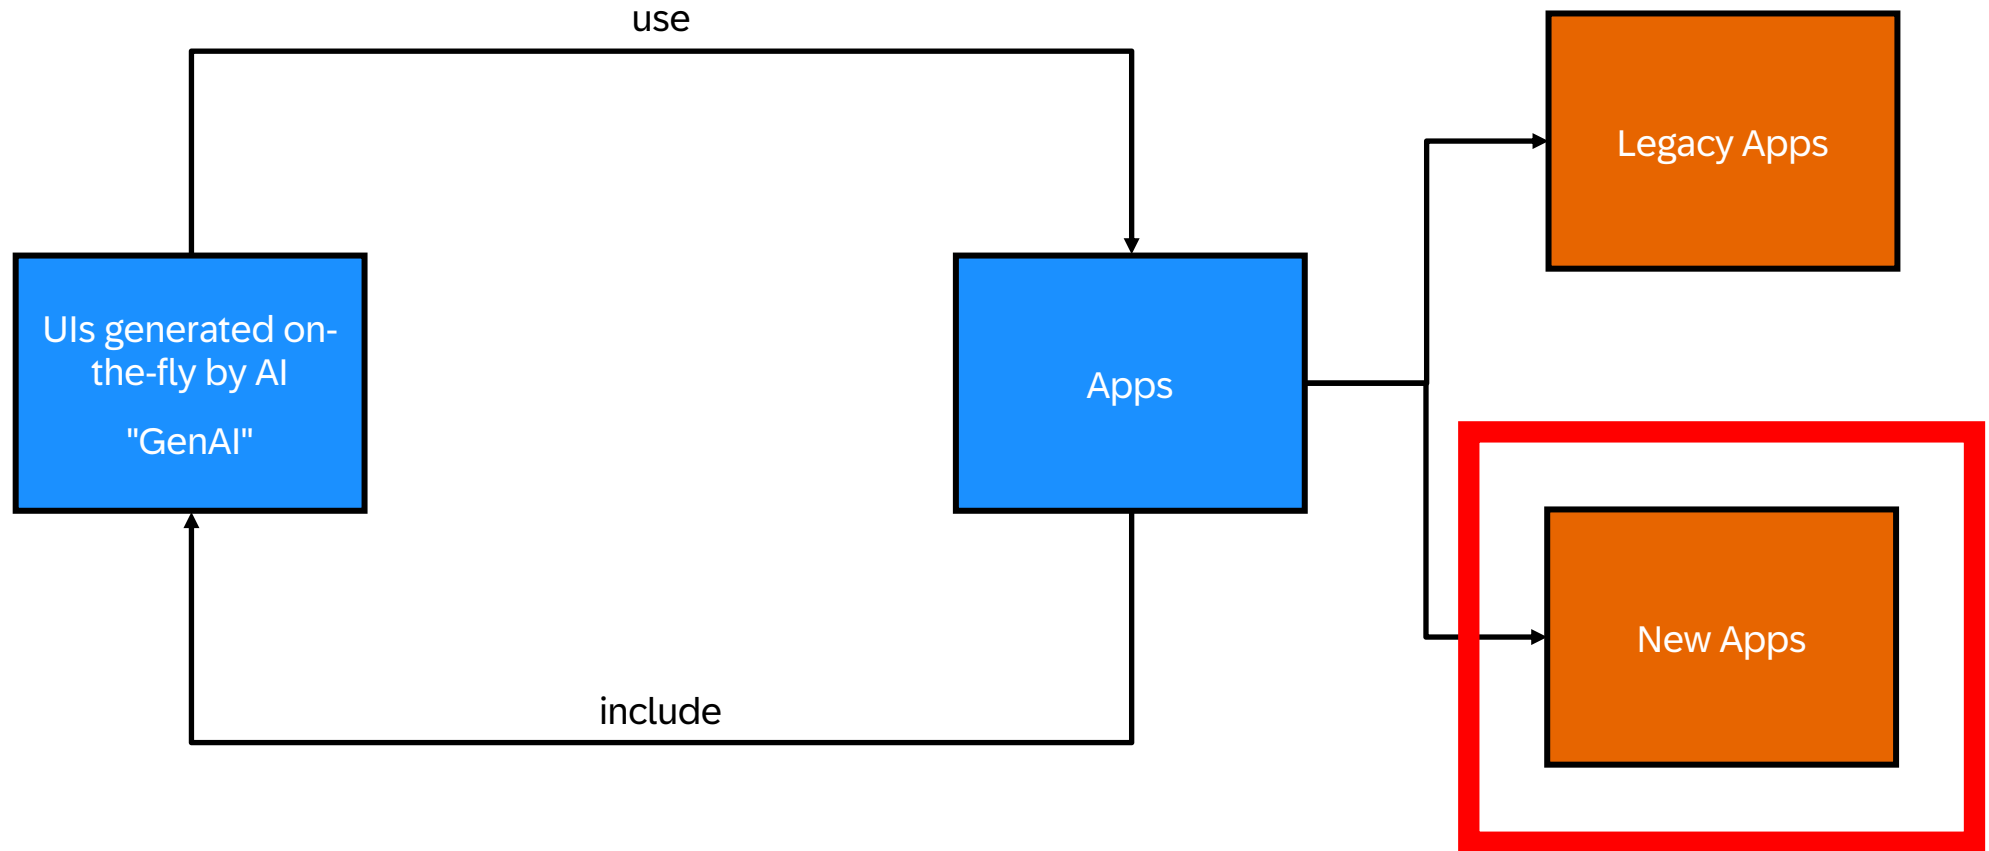

Boost UI5 expertise in your project

UI5 MCP server is in your corner

User Interfaces in the world of AI

UI5 Linter

Detect usage of
deprecated APIs

Identify legacy concepts

Fully integrated in UI5
MCP Server

Detect possible CSP
violations

Automatically fix
common issues

UI5 Linter 🤝 UI5 MCP Server

- Agent can check its own work
- Saves tokens by using Autofix
- Provides context information:
 - Relevant documentation from UI5 API reference
 - Migration guides for complex UI5 API changes

UI5 MCP Server is your UI5 expert

"Please do a code review"

"What does the code in `MyHome.controller.js`"

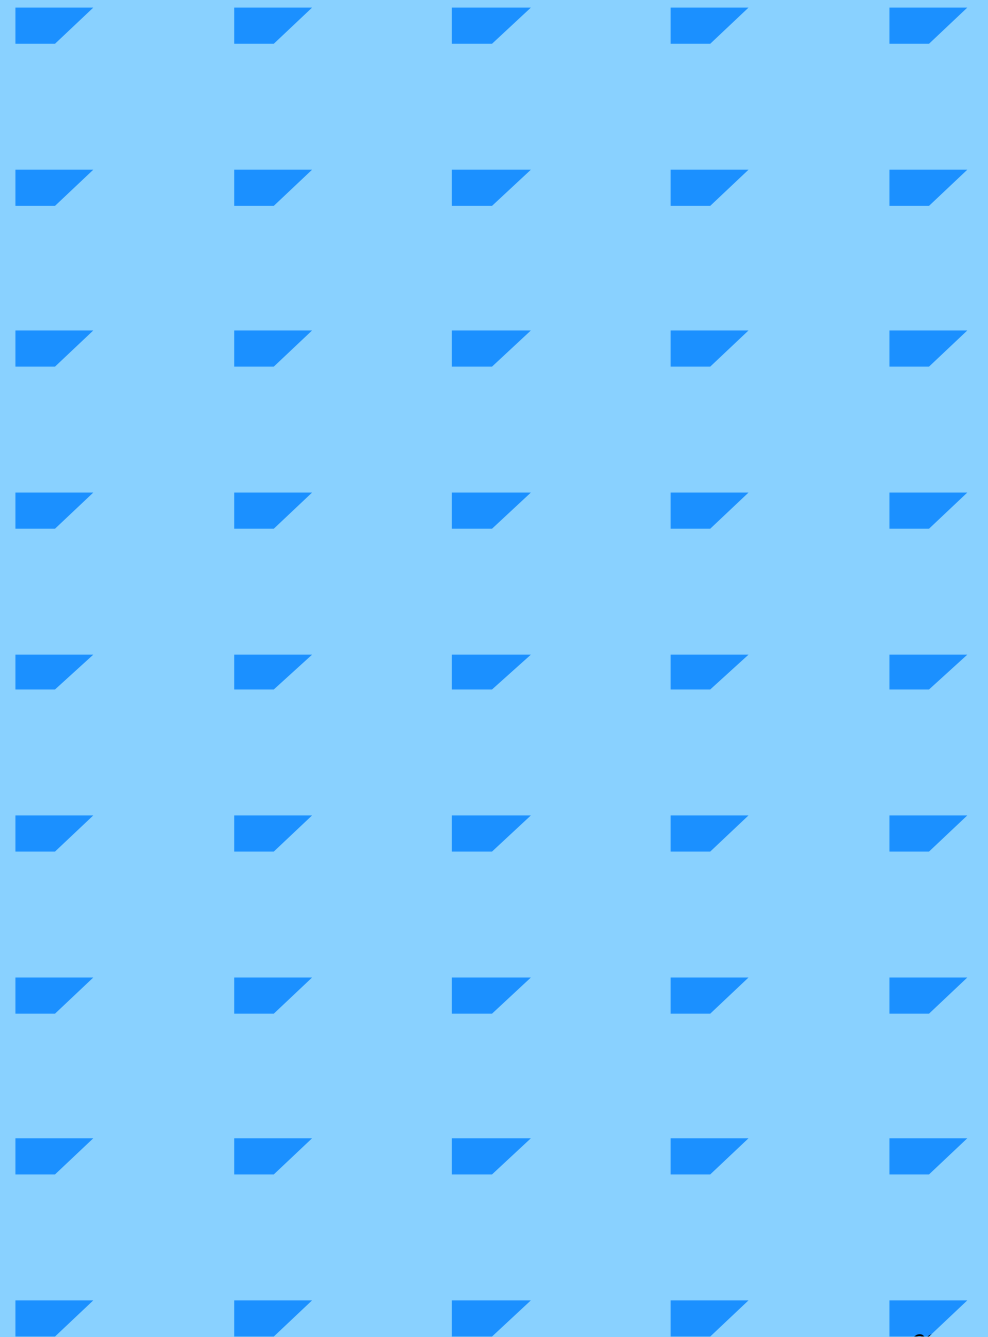

"Explain the Data Binding concept of UI5"

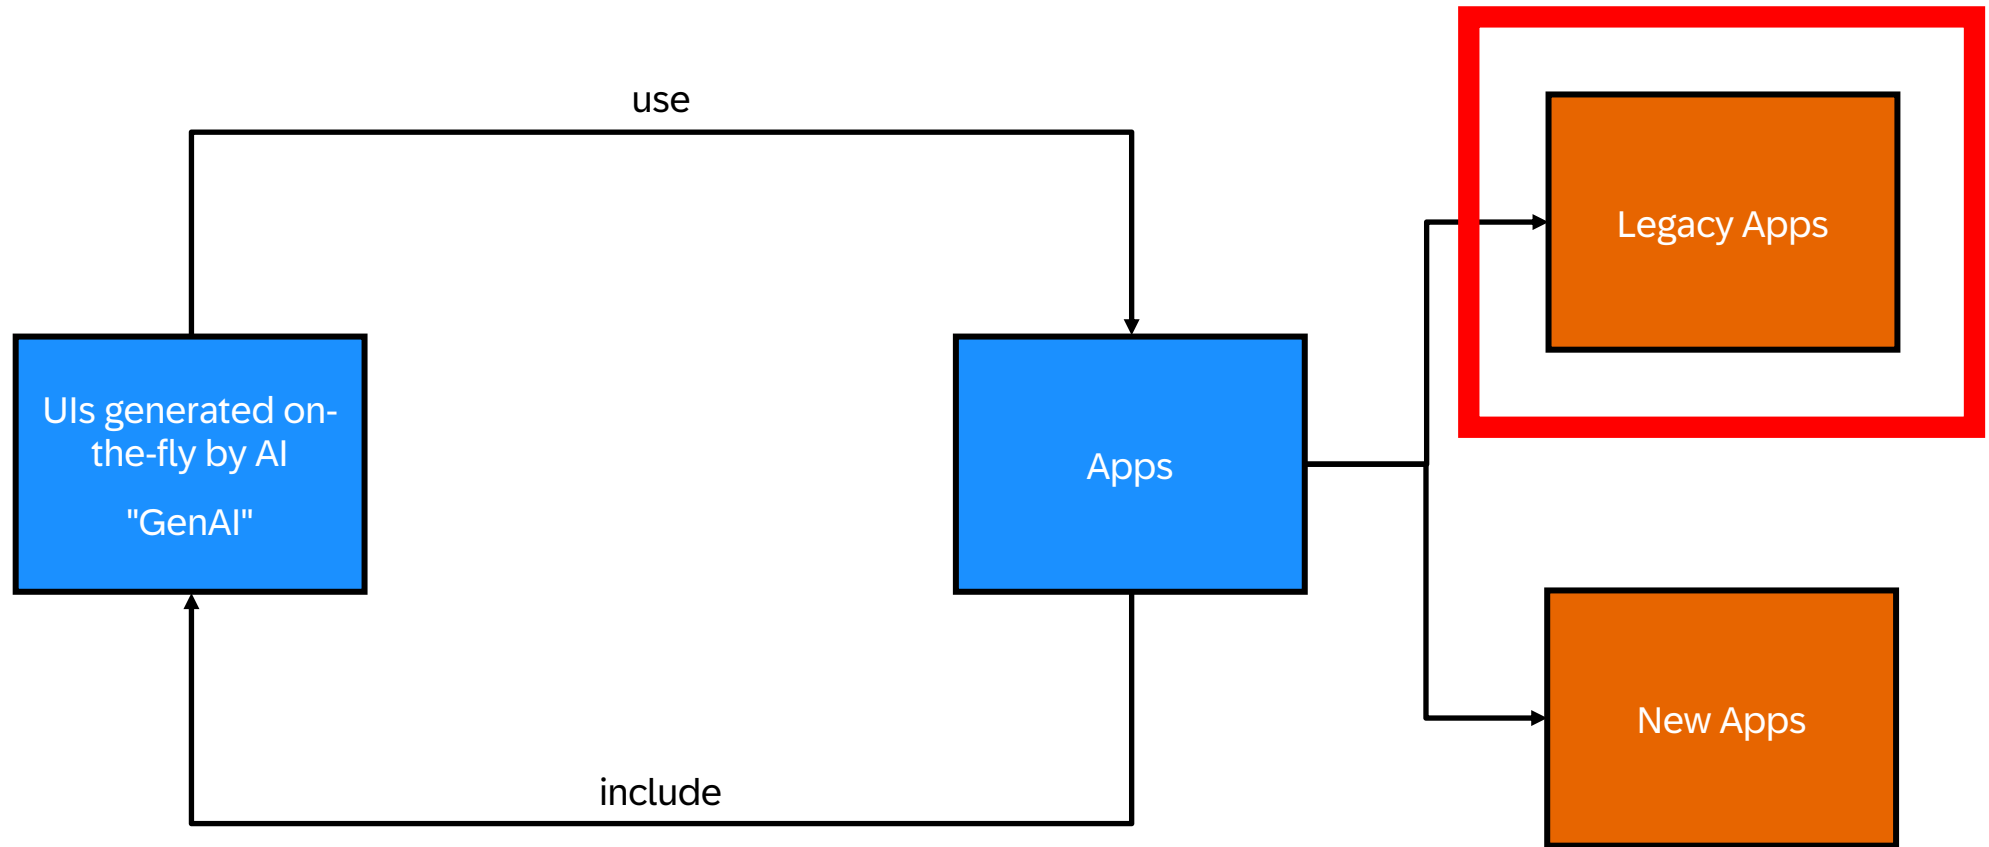

Get rid of legacy code

How to migrate your UI5 project with UI5 MCP server

SAP FlorianVogt
Product and Topic Expert

Tuesday

In September 2025, the initial release of UI5 MCP server was published. In [Give Your AI Agent Some Tools: Introducing the UI5 MCP Server](#) by [@merlin_beutlberger](#) you'll find a great overview of the available features and a detailed step-by-step guide. This blog post focuses on how UI5 MCP server can support you in migrating your UI5 project easily to the latest best practices with the help of GitHub Copilot Coding Agent. The results are really good.
