Beyond copilots: Agentic development with SAPUI5

Florian Vogt, SAP

September 2026

Agenda

01

Agentic Experiences

Application and Engagement Layer Experiences

02

How you build with AI today

Building and modernizing SAPUI5 apps.

03

Demo and Deep Dive

Let's Give Some Work to the Agents

04

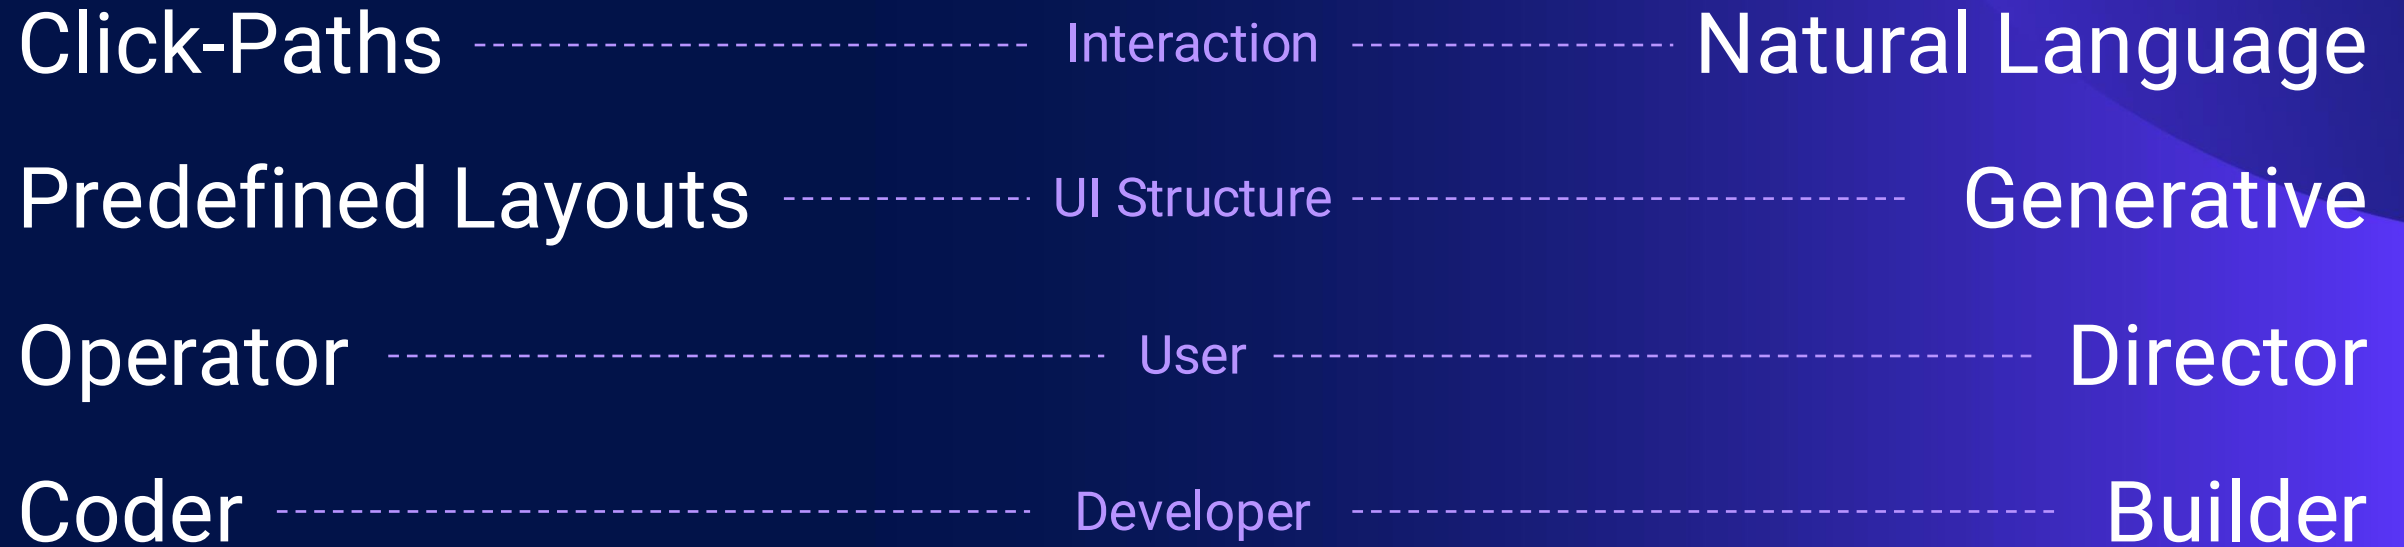

Key Takeaways

Learn. Apply. Succeed.

Application Experiences

Engagement Layer Experiences

SAPUI5

SAPUI5

SAPUI5 is SAP's JavaScript framework and UI library for building cross-platform, enterprise-grade Web applications.

Business Applications

SAPUI5 implements the SAP Fiori user experience and is widely used across SAP applications (and beyond).

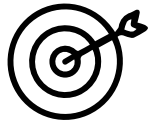

Application development

SAPUI5 provides a rich set of UI elements and efficient, AI-powered development tools.

Goal: Best-in-class support for agentic development

Goal #1

Creating and enhancing
state-of-the-art
SAPUI5 projects

Goal #2

Leveraging best practices
and avoid legacy patterns

Goal #3

Let the agent
be your pair programmer

Key Challenges of AI in Software Development

LLM uses outdated concepts

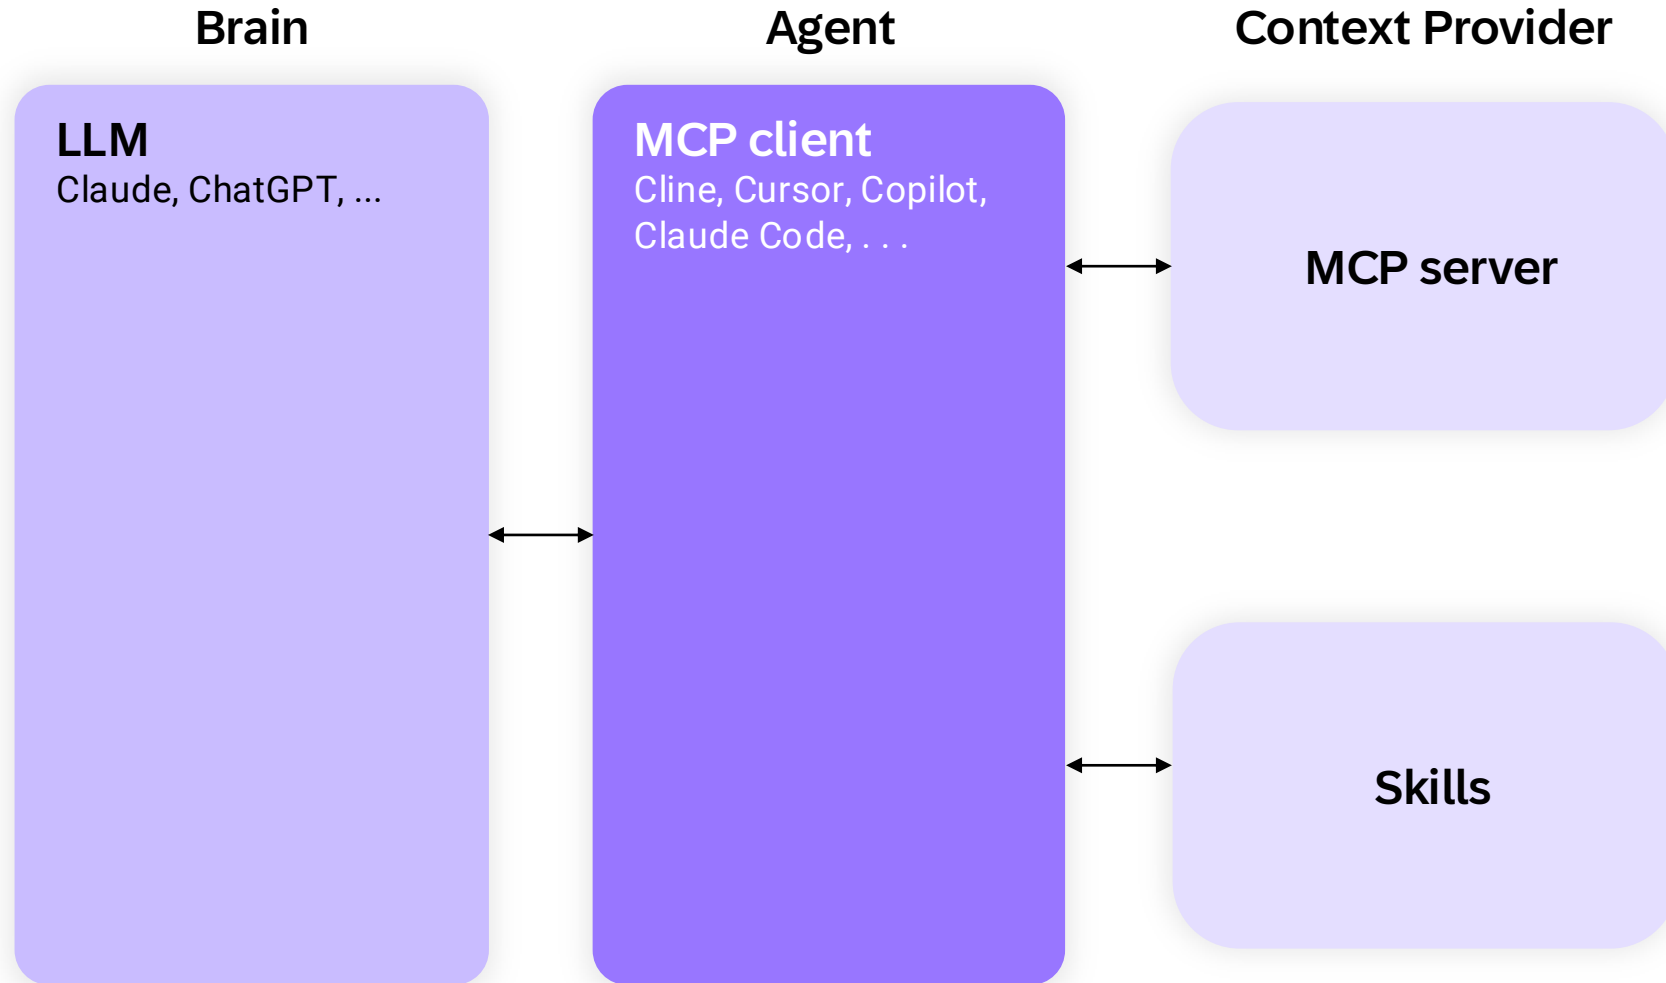

LLM uses older framework version

LLM does not use framework specific best practices

LLM generates code which does not work at all

Model Context Protocol (MCP) and Skills for Coding Agents

MCP is an open standard that lets AI models interact with their environment using external tools, data sources, and workflows through clients.

The agentic journey at UI5

2025 / 09

2026 / 03

2026 / 06

2026 / 07

UI5 MCP Server

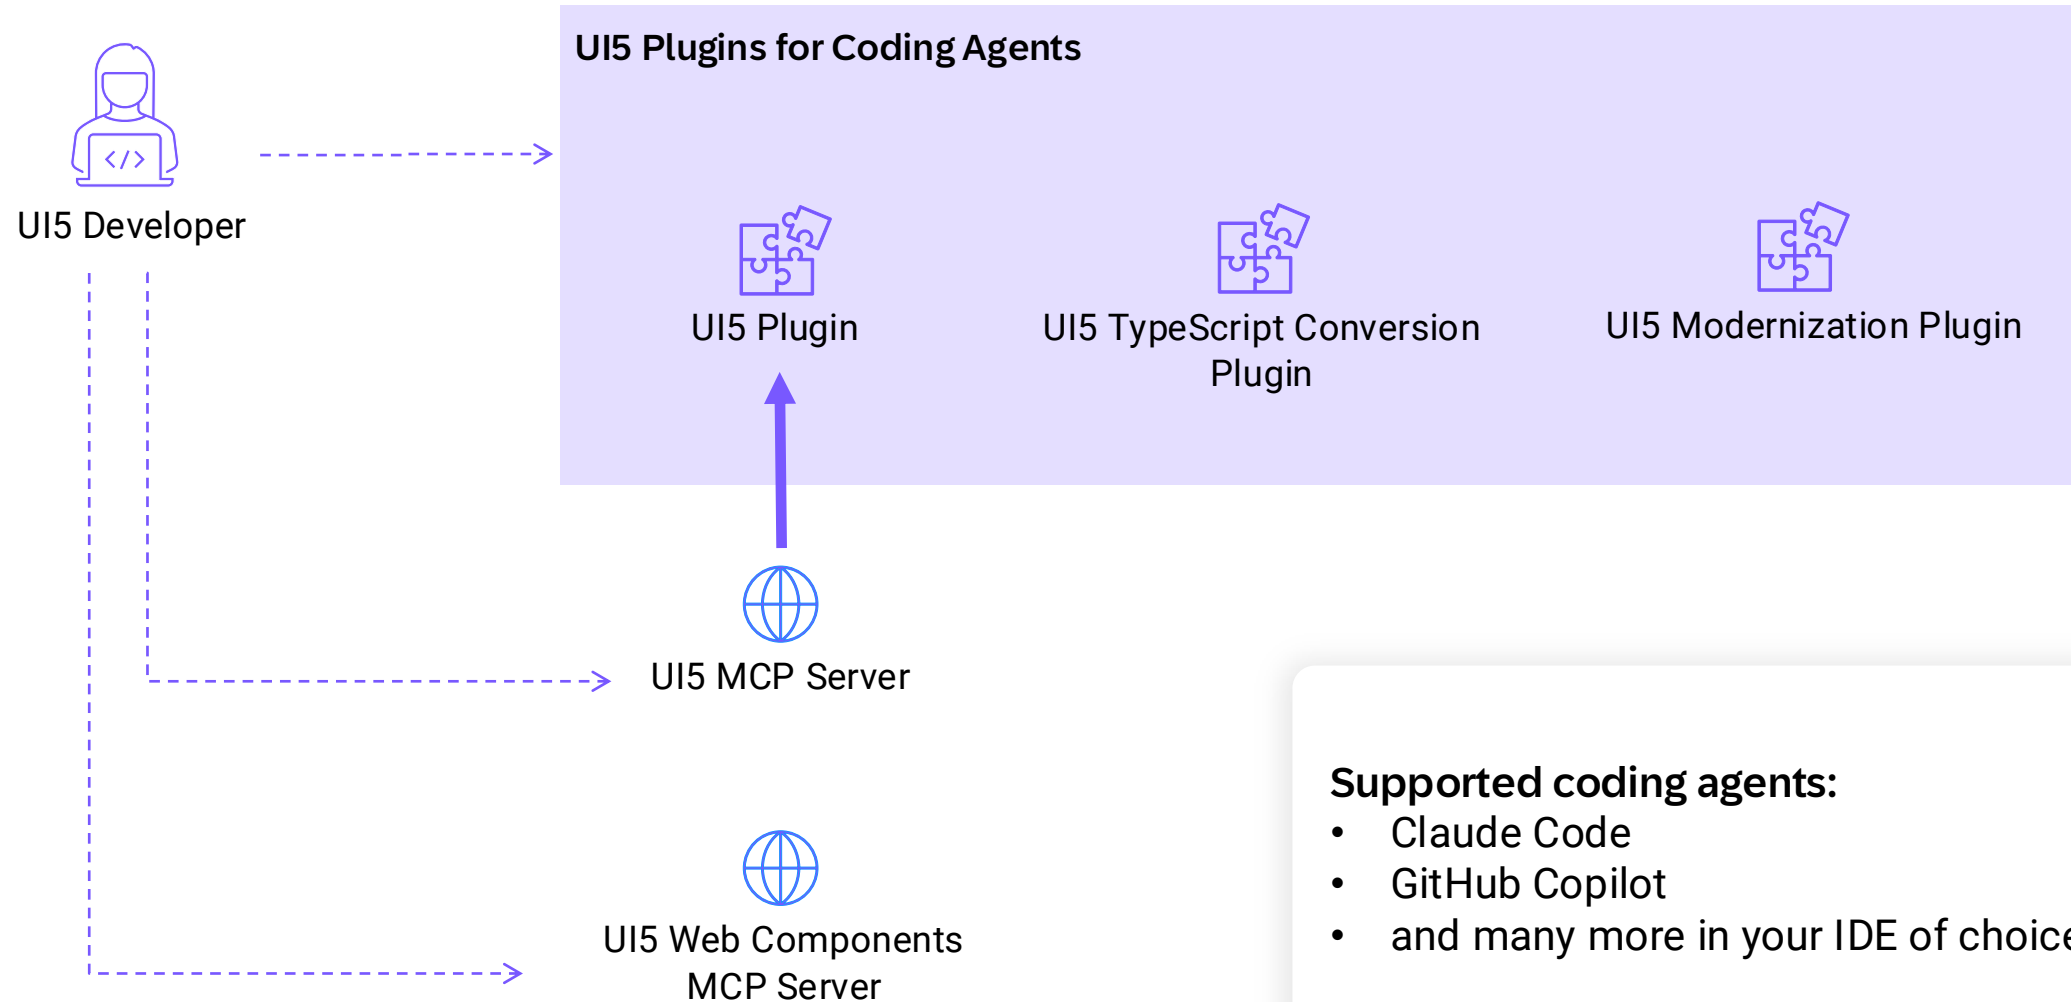

UI5 Plugins for Claude

**UI5 Plugins for Coding
Agents**

**UI5 Modernization
Plugin**

Agentic Capabilities for UI5 Development

Agentic Capabilities: Bringing Specialized Expertise to LLMs

- Helps with the creation and modification of projects when working with agentic AI tools
- Supports the developer to detect and fix errors in the code
- Provides additional framework specific information for agentic AI tools
- Supports with complex, costly tasks to reduce errors and token-usage

Demo: From Prompt to Production-Ready SAPUI5 Application

Demo: Modernizing SAPUI5 with AI-Assisted Development

Demo: JavaScript to TypeScript Conversion in Action

Key Takeaways

SAPUI5 Strategy

SAPUI5 remains SAP's strategic UI framework for building enterprise Web applications.

SAPUI5 Development

UI5 plugins for coding agents accelerate SAPUI5 application development with best-practice guidance.

Modernization

UI5 plugins for coding agents simplify modernization by replacing deprecated APIs / outdated UI5 patterns.

TypeScript Migration

UI5 plugins for coding agents enable seamless TypeScript conversion for SAPUI5 projects.

UI5 Plugins for Coding Agents

- Support for GitHub Copilot and Claude Code
- Bundles UI5 MCP server and UI5 skills
- New central offering for developers

<https://community.sap.com/t5/technology-blog-posts-by-sap/ui5-plugins-for-coding-agents-now-supporting-github-copilot/ba-p/14427058>

The screenshot shows a web browser window displaying a blog post. The title is "UI5 Plugins for Coding Agents: Now Supporting GitHub Copilot". The author is Florian Vogt, a Product and Topic Expert at SAP. The post text mentions the previous name "UI5 Plugins for Claude" and the new addition of GitHub Copilot support. Below the text is a large graphic with a blue-to-purple gradient. It features a white starburst icon, a plus sign, and the GitHub Octocat logo. The text "UI5 Plugins for Coding Agents" is prominently displayed, followed by a "NEW RELEASE" badge. At the bottom of the graphic, it says "Start your UI5 journey with Copilot and Claude".

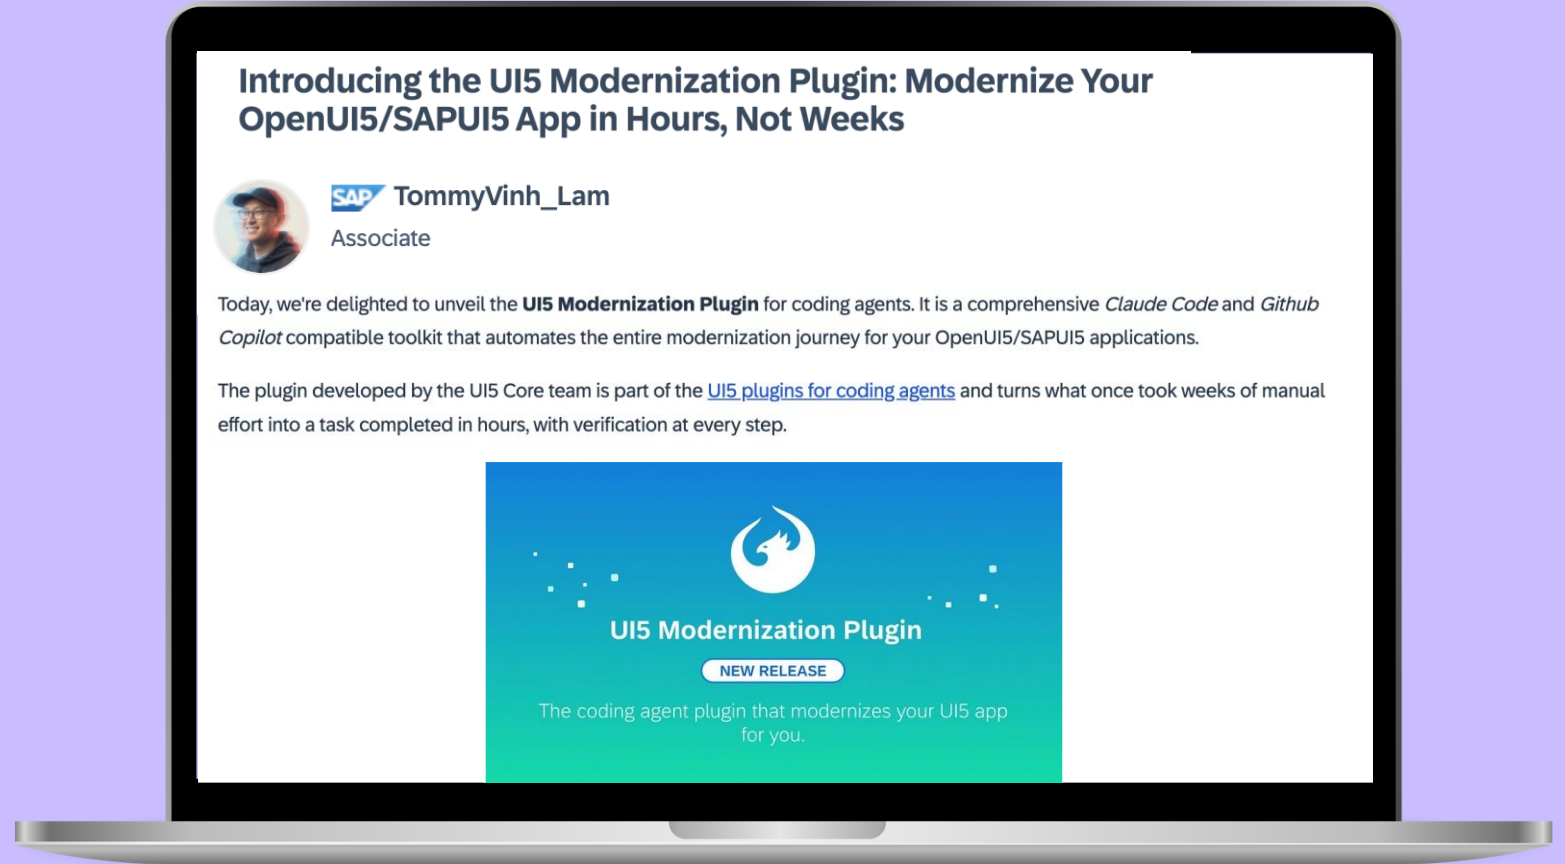

UI5 Modernization Plugin

Automate your modernization journey

- One command
- 19 specialized skills
- 5 phases
- 3 verification modes

UI5 MCP Server

- Initial offering for agentic development
- Offers UI5 expertise to generic trained LLMs

<https://community.sap.com/t5/technology-blog-posts-by-sap/give-your-ai-agent-some-tools-introducing-the-ui5-mcp-server/ba-p/14200825>

By developers,
for developers.

Thank you.
